

PARA DATA MAINTENANCE

With all of the constant changes to coding and billing requirements, many organizations are overwhelmed with maintaining billing systems. Annual pricing updates are also a challenge for many facilities. **PARA** has the capability to assist the hospital in the implementation of updated CPT®/HCPCS codes and prices through **PARA's Data Maintenance Services**.

PARA can produce a custom upload file or **PARA** will process the price change utilizing a VPN connection and Boston Workstation scripting to set each individual price.

Contact your PARA Account Representative to learn more about PARA's Data Maintenance program!
